

You Me and the Beat

No you don't need a reason, just get up and dance

When you turn up the music, let it blast
You and me the whole world, in the palm of our hands

Don't let it go, Don't let it go, Don't let it go

'Cause now, you're living life out loud
With your head up in the clouds
Yeah it feels so rough right now, now, now

You and me and the beat go great together
You and me and the beat go great together
You and me and the beat go great together
You and me and the beat go great together

now

Ohhh

You and me go great together

Ohhh

You and me go great together

Anything can happen, any time or place
From the floor to the raptors to outer space
We can move any mountain, just push the pace

Just let it flow, Just let it flow, Just let it flow

'Cause now, you're living life out loud
With your head up in the clouds
Yeah it feels so rough right now, now, now

You and me and the beat go great together
You and me and the beat go great together
You and me and the beat go great together
You and me and the beat go great together

now

Ohhh

You and me go great together

Ohhh

You and me go great together

When we're together some how it works
And having real friends makes it worth it

And in the future when we're both are
through that rear view mirror
We'll know we had good times

You and me and the beat go great together
You and me and the beat go great together
You and me and the beat go great together
You and me and the beat go great together
now

Ohhh

You and me go great together

Ohhh

You and me go great together
